

# DaaS

DEVICE AS A SERVICE

**Better than leasing. Better than buying.**

Need a better way to manage your devices? Up-to-date, secure devices are essential to business productivity, but because small business owners and IT leaders have an array of tasks, device refreshes are often extended well beyond their due dates. Let us free up your time to focus on running your business, while also keeping your devices modern and secure with **DaaS (Device as a Service)**.

• The DaaS model offers the flexibility required of businesses striving to meet the needs of the modern workplace. With DaaS, we can combine the best devices for your business, lifecycle services, and 24/7 support into an all-inclusive, managed solution—with per-user, per-month cost certainty.

• You can scale up or down on your devices, so you aren't paying for the ones you no longer need. Plus, we can refresh them quickly, upgrade to new technologies easily—and best of all—we take on the responsibility of managing and maintaining them.

# DaaS

DEVICE AS A SERVICE

## Here's what people are saying about DaaS:

We were able to purchase brand new servers, switches, firewall, wireless access points, and computers for a new location without the burden of tens of thousands of dollars in capital.

The DaaS program is fantastic because we are able to standardize hardware without a major capital expense up front.

Add end-of-life disposal so your team has one less thing to worry about!

Contact us today to discuss your options and see how the DaaS program will benefit your company.

## Here are some benefits you can look forward to:

- Reduced workload for IT thanks to no day-to-day management of devices
- Move purchases from Capital Expenditure to Operational Expenditure
- Lower upfront procurement cost
- Greater scalability and visibility on IT costs
- Deploy assets based on workload; flex up or down with changing workforce needs
- 24- or 36-month term options are available
